

Andrew V. Nebiosini

Wordpress Engineer | PHP & Wordpress Specialist | Accessibility (WCAG) Advocate

(631) 946-4252 - andynebs@gmail.com - www.andynebs.com

PROFESSIONAL SUMMARY Innovative Senior WordPress Developer with nearly 10 years of experience architecting scalable, high-performance CMS platforms and enterprise e-commerce solutions. Recognized expert in the modern WordPress ecosystem, specializing in React-powered Gutenberg block development, Full Site Editing (FSE), and headless architectures via WPGraphQL. Proven track record of reducing technical debt, optimizing Core Web Vitals for maximum SEO and rendering performance, and championing inclusive digital design through stringent WCAG 2.2 AA accessibility standards. Adept at bridging the gap between product design and engineering, mentoring cross-functional teams, and delivering custom PHP/React plugins that drive user engagement and organizational growth.

CORE COMPETENCIES & TECHNICAL SKILLS

- **WordPress Ecosystem:** Custom Theme & Plugin Development, Gutenberg Block API, FSE, WooCommerce, ACF.
- **Languages & Architecture:** PHP 8.x, React.js, JavaScript (ES6+), Headless WordPress, GraphQL, WP REST API.
- **Accessibility & UX:** WCAG 2.2 AA/AAA Compliance, ARIA Patterns, axe-core, NVDA, Screen Readers, Semantic HTML.
- **Performance & Database:** Core Web Vitals (LCP, CLS, INP), MySQL, Redis Object Caching, WP-CLI, Technical SEO.
- **Tools & Infrastructure:** Git/GitHub, Webpack, Docker, CI/CD Pipelines, GitHub Actions, Figma.
- **Engineering Leadership:** System Design, Technical Debt Reduction, Mentorship, Agile/Scrum Methodologies.

PROFESSIONAL EXPERIENCE

Halcyon | Long Island, NY *Senior WordPress Developer* | 2022 – Present

- Architected custom Gutenberg block libraries utilizing React and the @wordpress/create-block package, transitioning the platform away from legacy page builders and reducing content publication time by 30%.
- Engineered scalable Headless WordPress solutions leveraging WPGraphQL and decoupled React frontends, establishing secure data synchronization that reduced server response times by 40%.
- Enforced strict PHP and JavaScript coding standards, integrating ESLint and PHP_CodeSniffer into CI/CD pipelines to reduce runtime errors in production by 45% and streamline the peer code review process.
- Spearheaded enterprise-wide digital accessibility initiatives, utilizing axe-core, NVDA, and automated testing tools to audit and remediate custom themes, achieving strict WCAG 2.2 AA compliance and elevating Lighthouse scores from 70 to 98.
- Optimized Core Web Vitals and database architecture, implementing Redis object caching and resolving N+1 query issues to decrease average page load times by 52% and improve organic SEO rankings.
- Collaborated closely with product design teams in an Agile/Scrum environment, translating high-fidelity Figma mockups into responsive, accessible, and pixel-perfect WordPress production code.

MMEink | Farmingdale, NY *Lead Web Developer* | 2022

- Directed UI engineering for high-traffic responsive web applications, implementing semantic HTML and advanced ARIA patterns to ensure comprehensive ADA and WCAG 2.2 AA compliance across all custom WordPress templates.
- Led the strategic migration of legacy monolithic WordPress architectures to modern Full Site Editing (FSE) block themes, reducing technical debt by 40% and significantly improving cross-browser maintainability.
- Mentored a cross-functional team of junior developers in modern PHP and React design patterns, establishing standardized code review protocols that improved sprint delivery velocity by 20%.
- Managed asynchronous state and error handling during complex WP REST API integrations, ensuring highly dynamic and resilient user interfaces under heavy data loads.

Aim Services | Saratoga Springs, NY *Web Developer & Technical Consultant* | 2020 – 2021

- Served as a technical consultant designing and deploying high-performance WooCommerce e-commerce platforms, creating custom payment gateway integrations that increased client online transactions by over 30%.
- Engineered custom Content Management System (CMS) tooling to empower non-technical stakeholders, increasing content publication efficiency and client digital autonomy.
- Authored comprehensive technical documentation and facilitated digital literacy training for WordPress content managers, reducing recurring support tickets by 30% and accelerating client onboarding.
- Maintained 99.9% application uptime for mission-critical internal web portals by resolving critical technical escalation issues and implementing proactive system monitoring.

Quality Ventures | Hauppauge, NY *Full Stack Engineer* | 2018 – 2020

- Engineered full-stack WordPress solutions utilizing custom PHP plugins and Advanced Custom Fields (ACF), delivering highly flexible, user-centric CMS architectures for enterprise clients within an Agile SDLC.
- Architected and integrated secure RESTful APIs to interface seamlessly with legacy LAMP stack infrastructure and third-party CRMs, optimizing database query performance and reducing server payloads by 20%.
- Partnered directly with UI/UX designers and external stakeholders to translate complex business requirements into scalable, functional software features.
- Acted as the primary technical escalation point, successfully resolving critical infrastructure issues related to API data synchronization and cloud server environments.

Eastover | Lenox, MA *Web Developer* | 2014 – 2015

- Executed a full-scale content architecture audit and database migration from legacy Joomla to WordPress, systematically identifying and deprecating redundant data structures.
- Configured and deployed local web server infrastructure (Linux/Apache/MySQL) to host a custom corporate intranet, ensuring reliable property-wide network connectivity for guest services.

EDUCATION

- **State University of New York at Plattsburgh:** B.A. / M.S.T. Program for Adolescence English Education (Enrolled: 2015)
- **Suffolk County Community College:** Associate of Arts in Liberal Arts (2013)
